DRUGGED TO DEATH.

Second Victim of "Knockout Drops" Reported at Butte.

Special to The Tribune. BUTTE, Mont., Oct 9.—Charles Runkle of Centerville was found in a dying condition in an empty coal car, his face being smothered in dust, as

the result, it is believed by the officers, of being given knockout drops.

Runkle died several hours after being taken to the hospital. He is known to have had money with him when he left home earlier in the day, and is thought to have been given the deadly drug at some of the resorts visited by him.

Runkle's death makes the second in Butte from knockout drops within the must week. Last Tuesday night Edward Wegner, a well-known contractor of the city, was drugged to death and robbed of \$500. His body was found crammed into an alley in the rear of an East Park street saloon.

Monday afternoon is the time. Salt Lake Theater is the place. County mass convention of the American party is the event.

A NATURAL SANITARIUM.

What a Scientific Observer Has to Say About California.

Lleut. John P. Findley, while in charge of the United States weather bureau at San Francisco, contributed an article to a prominent magazine on the climatic conditions of California, in which the following statement ap-

peared: "Theoretically, California should fur-nish the best and most varied health resort and sanitariums in the United States. Within her borders almost evstates. Within her borders almost every form of wasting disease should find the means of temporary, if not permanent, relief."
This theoretical statement, from an unbiased, scientific standpoint, is abun-

dantly confirmed by experience. The cool and bracing coast climate, devoid of any trace of malaria, extends from the northern part of the State to the extreme south. There is the choice be-tween this cool, humid atmosphere and

the dry, warm atmosphere of the in-land valleys.

Of altitude there is yet a greater dif-ference. From Plain Valley, 300 feet below sea level, to the upper Sierras, 7000 or 8000 above, any altitude can be selected, and comfortable homes be

The peculiarity of an almost rainless summer, during which the injurious germs of animal and vegetable decay are destroyed by thorough desiccation, s one of the striking features of California climate.

During the rainy season it is usually

the result is, except along some of the river valleys an absolutely pure at-mosphere. The ocean winds entering through the several coast openings, are tempered by the intermediate area passed over, and often receive desir-able healing properties by taking up the resinous odors of the pines and redwoods of the coast range.

The skillful physician, acquainted with the climatic conditions, should

find little difficulty in selecting a local-ity where climate and environment will do all that these agencies can ever do toward the restoration of health. There is enough of wildness to keep the mind constantly engaged, and enough of civengaged, and enough of civ-ilization to satisfy the most exacting. People whose systems are charged with malaria, or are "run down" by overwork, find immediate and in many cases permanent relief in this invigor-

ating climate. For descriptive and illustrative literature, call on or address, D. R. Gray, general agent, S. Pac. Co., 201 Main street, Salt Lake City, Utah
